AI agents: optional add-on

For Gritz N Wafflez

Everything else is already in your package: the app, the menu, the Order Up! game, rewards and referrals, QR stickers, table cards and the window poster, your setup and updates. The AI agents are optional and have their own monthly fee, because they use phone lines, texts and AI minutes every month. Pick one tier per restaurant. Month to month: change or turn it off anytime.

Tier 1: AI Text Assistant · $75/mo

Customers text your number and an AI texts back 24/7: hours, location and parking, menu, prices and specials, the app and rewards link, catering and party inquiries, FAQs. It collects reservation requests and sends them to your staff, and hands anything it can't answer to you or your manager. Missed-call text-back: if a call isn't answered, the caller gets a text so they can keep going by text.

1,000 texts a month included, plenty for most restaurants. Then $0.03 a text.

What the $75 pays for

Up to 1,000 texts (carrier + Twilio, about 1.5¢ each)	~$15
The AI that writes the replies	~$6
Text number + carrier registration (A2P 10DLC, required to text customers)	~$6
Missed-call text-back + hand-off to you or your manager	~$8
Setup on your menu, specials + FAQs, monitoring, updates	~$40
Per restaurant, per month	**$75**

MOST POPULAR · EVERYTHING

Tier 2: AI Voice Host + Text Assistant · $150/mo

A natural AI voice answers your phone 24/7 or only after hours: it answers questions, takes reservation requests, transfers to staff when needed, and texts links (menu, app, directions) during the call. Includes everything in the AI Text Assistant.

750 call minutes plus 1,000 texts a month included, plenty for most restaurants. Then $0.15 a minute and $0.03 a text.

What the $150 pays for

AI voice, up to 750 minutes (ElevenLabs, about 8¢ a minute)	~$60
The AI brain that understands callers	~$7
Phone number + incoming call minutes (Twilio)	~$8
Texting: up to 1,000 texts, AI replies, carrier registration	~$27
Setup on your menu + specials, weekly call reviews, updates	~$48
Per restaurant, per month	**$150**

Examples

Text Assistant, one restaurant	$75/month
Voice Host + Text, one restaurant	$150/month

Elsewhere (typical published pricing, Oct 2026): AI phone answering like Loman or Slang.ai runs about $199–$399 a month, an AI texting agent like Dialzara about $69, and missed-call text-back like Quo $15–$19. A part-time host just to answer phones costs about $2,500+ a month.

Texting needs carrier registration (a few days) and the voice host needs call forwarding on your number. SousShift handles both. No guarantees on results: it makes sure every text and call gets an answer.
